Headway Black Country Services:

Information for Referrers

Brain Injury Rehabilitation

The Headway rehabilitation service works with survivors to relearn lost skills, learn new skills, develop insight into their condition and to improve confidence and self-esteem. The sessions provided by Headway aim to assist people with brain injury to return to community living and productive activity. This is achieved through the provision of structured sessions as part of a day opportunities programme. Our clients work to progress against their individual learning objectives and are supported through regular key working and progress reviews.

Outreach Service

This service is dedicated to supporting clients and carers of brain injury survivors helping them to access the specialist support and information that they need.

This service is currently free, subject to availability.

CAB

With the help of the Big Lottery Reaching Communities Fund we are able to offer with our Partner Dudley Citizens Advice a free independent and confidential advice service specifically for people with Acquired Brain Injury, their families and carers

This service is currently free, subject to availability.

Counselling Service

We are now offering a counselling service. Emotional support can be very important in helping survivors and their carers adjust to the changes that have occurred.

This service is charged, although costs are being kept as low as possible.

You can find out more information about the services Headway Black Country provides at www.headwayblackcountry.co.uk
