

Headway Black Country Willenhall Life Skills Activity Session Programme

Our sessions have been designed to assist clients to adjust to life changes, increase independence, re-learn life skills, improve cognitive skills, benefit from peer support, improve social skills and reintegrate into the community. We are adopting an Occupational Performance approach, strengthening the focus across all our sessions on skills for daily living. Within all sessions there are supervised breaks for the groups to take refreshments and structured opportunities for socialising and peer to peer support.

In our structured sessions, clients are supported and encouraged to achieve goals; progress is regularly assessed and monitored. Each client has an allocated key worker who meets regularly with the client to discuss progress and address issues which may affect wellbeing or inhibit learning.
